PRODUCT GUIDE

S5 & S7

Advanced Vehicle
& Asset Tracking

INTRODUCTION

ScorpionTrack DRIVER is an advanced vehicle tracking solution with 24/7/365 theft monitoring. Delivering you security and peace of mind, whilst offering a comprehensive range of features for life on the road.

Ultimate Accuracy & Reliability

GPS, GLONASS & Galileo satellite location provides ultimate accuracy especially in built-up areas whilst multi-network roaming GSM technology ensures ultimate reliability.

European Coverage

Included as standard with no hidden charges.

Health Checks

A pre-set self-diagnostic checks are generated once every month or every time the system alerts

Insurance Approved

Choose from either the ScorpionTrack DRIVER S5-VTS or S7-ALS system, both tracking solutions are insurance approved to Thatcham Security Certified (TSC) S5-VTS or S7-ALS criteria.

Police Preferred Specification

ScorpionTrack Stolen Vehicle Tracking systems meet Police Approved Standards and Police Preferred Specification

UK Designed & Manufactured by Scorpion Automotive

Scorpion Automotive has remained at the forefront of vehicle electronics and security technologies since its inception in 1973.

THEFT TRACKING

With a vehicle stolen every 5 minutes* and theft practices changing to overcome new vehicle technologies, the extent and effects of vehicle theft is often easy to underestimate.

The personal inconvenience, emotional distress and cumulative insurance costs of increased premiums and excess payment. Delays in claims payment, interim costs of public transport use or vehicle hire and deficit between claim settlement and total replacement vehicle costs also take their toll.

ScorpionTrack DRIVER builds on ScorpionTrack's expertise in theft prevention technologies and post theft vehicle recovery rates. Key features include:

Full 24/7/365 Theft Monitoring

Upon unauthorised movement detection, the ScorpionTrack device discretely notifies our 24/7/365 Monitoring Centre of a possible theft.

Police Liaison

In the event of a theft, the ScorpionTrack Monitoring Team co-ordinate directly with Police Force control rooms and units providing real-time location and other data with the aim of quickly recovering the vehicle and arresting the suspects.

Tamper & Tow Away Alerts

Receive early warning theft alerts based on ignition, GNSS, ADR tag** & battery status plus alerts if the vehicle is towed or moved using a transporter

* The Office for National Statistics showed that between 2017 and 2018, police in England and Wales received 111,999 reports of vehicle theft.

** S5-VTS system only

ENHANCED PROTECTION

ScorpionTrack Driver S5-VTS responds to the growing trends of vehicle theft including instances where the owner's keys are cloned or the vehicles' on-board computer is hacked.

Automatic Driver Recognition

Automatic Driver Recognition S5 tracking systems are supplied with two discreet Automatic Driver Recognition (ADR) tags. If the vehicle is moved without the tag present, the unit sends an alert to our 24/7/365 Monitoring Centre, who will contact you to confirm whether a theft has occurred.

Immobilisation Upgrade

An additional layer of security that is independent of vehicle manufacturer's in-built immobilisation systems that are often vulnerable to electronic attack.

Automatic Immobilisation

The vehicle will only start when the authorised driver possessing the ADR tag is present. Only available on S5-VTS systems.

Remote Immobilisation

In the event of a theft, the ScorpionTrack Monitoring Team can remotely immobilise the vehicle preventing the engine from being restarted.

Alarm Upgrade

Add a Scorpion alarm system and connect to the ScorpionTrack Driver S5-VTS tracking device you will receive alerts in the mobile app or via SMS if your vehicle alarm triggers.

* Additional hardware required at the point of installation. Please consult your installing dealer.

3 Year Standard Warranty

When you invest in a ScorpionTrack product, you have secured peace of mind from an established British based manufacturer offering a 3 year comprehensive warranty as standard. 2 year Hardware warranty is also included,

MULTI VEHICLE SUPPORT

If you have more than one vehicle or have other vehicles in your family, ScorpionTrack DRIVER offers a number of distinct benefits.

Multi Vehicle Tracking

Suitable for cars, vans, motorhomes with an S7-ALS (Asset Location system) option for caravans or basic vehicle protection. Systems for motorcycles and quad bikes are available from our Datatool range. All vehicles can be tracked within the same web portal and mobile app.

Family Sharing

You and your family members have the option to add vehicles to a Family Account whilst sharing location data; or set up individual accounts.

Privacy Mode

Allows a driver to stop recording live location and historical journey data. Activating Privacy Mode does not inhibit the theft tracking functionality of the system. In the event of a confirmed theft, access to location data and other status info is restricted to the 24/7/365 Monitoring Centre who will engage with the Police as per normal theft protocols.

CONVENIENCE FEATURES

In addition to its advanced theft protection technology and monitoring service, ScorpionTrack DRIVER offers many useful features for life on the road.

Journey History

Generate latest and historical journey reports.

Geofence Alerts

Set geofence locations to get in-app alerts or generate reports when vehicles enter and exit these locations.

Private and business mileage

Produce reports to check against expenses and HMRC compliance.

Live Dashboard

Customisable graphs and charts of journey related data.

Driver Behaviour Analysis

Provides driving style data to help reduce your motoring costs (fuel, wear and tear) and increase safety. This data is not shared with any third party.

Modes

Avoid false theft alerts by setting Transport Mode when travelling by ferry or Garage Mode when your vehicle is being serviced. Modes can be set via the mobile app.

MOBILE APP

The ScorpionTrack mobile app allows you to remotely access and manage security, safety and convenience features including:

Account management, preferences and modes

Enable/disable multiple alert types

Vehicle location & status updates

Find my vehicle with directions

Touch ID or Pin Code Log-in

Account settings, vehicle location and journey history are just some functions available on demand via mobile app or online portal.

Using the familiar Google interface you can toggle between Satellite, Map and Street View.
