What is the "DON'T PANIC" Alarm?

The "DON'T PANIC" wild camping alarm has been developed by Motor Mods following a huge number of requests from customers wanting additional security on their motorhomes.

Most motorhomes are already protected by an alarm and/or trackers but some customers want more, especially when camping in secluded spots, known as 'wild camping', or even just those odd nights in lay-by's and services.

The Wild Camping Alarm is designed to protect people and property. There are many reported cases of vehicles being attacked in secluded places, in some cases using potentially life threatening chemicals/gas. The aim is to deter the intruder quickly using the criminals greatest enemies, noise and strobe lights.

The "DON'T PANIC" Alarm Features:

Watch the video on our website

There are **THREE** triggers for the "DON'T PANIC" alarm:

1. User activated - a panic button is discreetly mounted within easy reach of the bed. We also supply you with two remote controls which allow you to set off the "DON'T PANIC" alarm from anywhere inside the motorhome, or from outside (within 10 meters).
2. A Vehicle alarm trigger – if your existing alarm is triggered by a break in, the "DON'T PANIC" alarm will also trigger (vehicle needs to have a suitable alarm already fitted for this feature to work. This can be installed at additional cost, if required).
3. A Gas sensor discreetly mounted close to air vents. If gas is detected, the "DON'T PANIC" alarm will trigger, waking you up before the gas can do you harm.

How does the "DON'T PANIC" Alarm work?

On activation there is an explosion of sound and light. The alarm has a loud speaker that yells for attention "**BACK OFF, BACK OFF, OWNERS ALERTED!**" (words can be customised), and extremely bright flashing strobe lights fitted discreetly around the vehicle, spark into action giving almost a daylight effect.

The combination of noise and light will deter all but the most determined of criminals and in any respect will attract a great deal of attention.

What do we install?

- 1) Loud speaker – Audible customisable deterrent
- 2) Strobe lights – Light deterrent
- 3) Gas alarm – Safety feature
- 4) Panic button – Safety feature
- 5) Two remote controls – Safety feature
